VINIFICATION

Double-arched cane
30-180 mt above sea level
September
Initial de-stemming (separation of the berry from the stem) and subsequent soft pressing (separation of the must from the grape skin) in an environment in a controlled atmosphere and protected from the risk of oxidation and bacterial proliferation.

PRISE DE MOUSSE

1st fermentation with transformation of the must into wine at a controlled temperature between 14° and 16°. With the Martinotti method in autoclave where the 2nd fermentation takes place for at least 20/30 days. The fermentation process is monitored and managed, automatically analyzing the evolution and dosing nutrients and oxygen to get the best results from the yeast.
